Hiring Manager DataRobot R&D

Dear DataRobot Team,

I am excited to apply for the AI Support Engineer II position at DataRobot. With over six years of experience in customer support and a strong background in AI platforms, I am eager to contribute to your mission of delivering impactful AI solutions that minimize business risk. My proven ability to troubleshoot complex issues and collaborate with cross-functional teams aligns well with the responsibilities outlined in your job description.

In my current role as a Support Engineer at Kiran Engineering Works, I have successfully provided expert support for AI platform users, resolving 95% of issues within SLA. My hands-on experience with Kubernetes-based applications has allowed me to enhance uptime by 40% through effective troubleshooting and collaboration with engineering teams. I am particularly passionate about applying AI tools to improve support services, having participated in projects that automated customer service tasks and increased efficiency by 20%. I am also adept at documenting solutions and creating knowledge base content, which has improved self-service resolution rates by 30%, empowering users to find answers quickly.

I am enthusiastic about the opportunity to join DataRobot and contribute to your innovative approach to AI support. I am confident that my skills in customer communication, incident management, and technical troubleshooting will allow me to make a meaningful impact on your team. I look forward to the possibility of discussing how I can help enhance the customer experience at DataRobot.

Sincerely,

Parmeet Singh
