

Parmeet Singh Granthi

+91 7420004161 | parmeet.singh@parmeetsingh.com

Professional Summary

Proactive problem-solver with extensive experience in performance engineering, focusing on large-scale data systems. Skilled in building advanced profiling and observability infrastructure to enhance system performance. Proven track record of identifying and resolving performance bottlenecks using profiling tools and data-driven analysis. Adept at collaborating with cross-functional teams to drive customer-centric outcomes and foster a performance-oriented culture. Committed to delivering optimal solutions while maintaining high standards of empathy and collaboration. Passionate about leveraging technology to create trustworthy decision intelligence. Experienced in distributed systems, database internals, and mathematical optimization. Dedicated to translating complex challenges into actionable insights that enhance business operations.

Core Skills

- Performance Engineering: Profiling, Observability, Benchmarking, Distributed Systems
- Tools & Technologies: Datadog, Honeycomb, LogicMonitor, Python, Go
- Methodologies: Agile, SDLC, Data-Driven Analysis, Collaboration
- Optimization: Bottleneck Resolution, System Uptime, Performance Metrics
- Communication: Cross-Functional Collaboration, Customer-Centric Solutions, Empathy

Experience

Kiran Engineering Works - proactive problem-solver

Sep 2017 - Present · Chhatrapati Sambhajanagar, India (formerly Aurangabad)

- Developed ML dashboards for real-time monitoring, improving response time by 40%.
- Implemented RAG assistants, cutting lookup time by 70% and enhancing operational efficiency.
- Created multi-agent workflows for compliance, saving over 50 hours monthly in manual tasks.
- Automated finance and HR processes, increasing throughput and accuracy in data handling.
- Trained predictive models on operational data, reducing downtime by 30% and boosting productivity.
- Deployed ML inference pipelines, improving system uptime to 99.5% with robust logging.
- Integrated LLM-based retrieval into CRM, enhancing response time by 60% and customer satisfaction.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Contributed to enterprise application development, enhancing user experience and functionality.
- Utilized Python for scripting and building REST APIs, improving integration efficiency.
- Supported testing and deployment processes, ensuring high-quality software delivery.
- Gained exposure to Agile workflows, enhancing team collaboration and project outcomes.

Projects

Performance Optimization Initiative

- Developed a comprehensive profiling tool that reduced latency by 25% across applications.
- Collaborated with teams to implement observability practices, improving system reliability.

Distributed Systems Enhancement

- Designed and implemented a distributed tracing system, leading to a 30% reduction in troubleshooting time.
- Enhanced data flow efficiency, resulting in a 20% increase in overall system performance.

Customer-Centric Solutions

- Led cross-functional workshops to identify performance bottlenecks, driving a 15% increase in customer satisfaction.
- Developed actionable insights from performance metrics, aligning engineering efforts with business goals.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
