

Parmeet Singh Granthi

+91 7420004161 | parmeet.singh@parmeetsingh.com

Professional Summary

Proactive problem-solver with a strong focus on performance engineering and large-scale data systems. Experienced in building observability infrastructure and resolving performance bottlenecks effectively. Skilled in collaborating with cross-functional teams to enhance system performance and reliability. Adept at utilizing distributed tracing tools to identify issues and optimize workflows for better outcomes. Committed to delivering impactful solutions through data-driven analysis and technical excellence. Passionate about fostering a collaborative environment that prioritizes empathy and results. Proven track record in implementing performance-oriented practices across engineering teams. Driven by curiosity and a desire to redefine how AI learns from structured enterprise data.

Core Skills

- Performance Engineering: Distributed Systems, Profiling, Observability, Benchmarking
- Tools & Technologies: Datadog, Honeycomb, Python, Go
- Collaboration: Cross-Functional Teams, Agile Methodologies, Design Reviews
- Optimization: Performance Bottlenecks, Tracing, Data-Driven Solutions
- Cloud Platforms: AWS, GCP, CI/CD, MLOps

Experience

Kiran Engineering Works - proactive problem-solver

Sep 2017 - Present · Chhatrapati Sambhajinagar, India (formerly Aurangabad)

- Developed real-time dashboards for anomaly detection, enhancing monitoring efficiency by 40%.
- Implemented RAG assistants, cutting lookup times by 70% and improving operational workflows.
- Created multi-agent LLM workflows for compliance, saving over 50 hours monthly in manual tasks.
- Automated finance and HR processes, boosting accuracy and reducing processing time by 30%.
- Trained predictive models on operational data, achieving a 30% reduction in downtime.
- Deployed ML inference pipelines, increasing system uptime to 99.5% through effective logging.
- Integrated LLM-based retrieval in CRM, enhancing response times by 60% and customer satisfaction.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Assisted in developing enterprise applications, improving functionality and user experience.
- Utilized Python for scripting and building REST APIs, enhancing system integration capabilities.
- Contributed to testing and deployment processes, ensuring high-quality software delivery.
- Gained exposure to Agile workflows, enhancing project management and team collaboration.

Projects

Performance Optimization Initiative

- Enhanced system performance by implementing distributed tracing, reducing latency by 25%.
- Collaborated with teams to identify and resolve bottlenecks, improving overall efficiency.

Observability Infrastructure Development

- Designed and deployed observability tools, increasing monitoring capabilities by 50%.
- Streamlined performance analysis processes, enabling quicker issue resolution across teams.

Cross-Functional Collaboration for AI Solutions

- Partnered with engineering teams to integrate performance best practices, fostering a culture of excellence.
- Led design reviews that improved system architecture, resulting in a 20% increase in throughput.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
