

Parmeet Singh Granthi

parmeet.singh@parmeetsingh.com | +91 7420004161 | parmeetsingh.com | LinkedIn

Professional Summary

Innovative AI & ML Engineer with a focus on Generative AI, RAG frameworks, and NLP applications. Proficient in developing and deploying advanced AI solutions using LangChain, LangGraph, and CrewAI, with extensive experience in Python, PyTorch, and Generative AI methodologies. Adept at creating scalable AI systems with vector databases (FAISS, Pinecone) and deploying via modern stacks including FastAPI, Docker, PostgreSQL, and cloud platforms (AWS/GCP). Committed to translating cutting-edge AI research into impactful applications, ensuring ethical and secure AI deployment through thorough evaluation and monitoring.

Core Skills

- Generative AI & RAG: RAG, LangChain, LangGraph, CrewAI, LangSmith (Evaluation & Monitoring)
 - Vector Databases & Retrieval: FAISS, Pinecone, Weaviate, Document Loaders, Text Splitting, Retrievers
 - AI & ML: Python, PyTorch, Generative AI, NLP, LLMs, Prompt Engineering, Fine-Tuning, Chatbots, MLOps
 - Build & Deploy: FastAPI, Docker, Streamlit, CI/CD, AWS/GCP, PostgreSQL, Pydantic, Integrations, Security
 - Data, Tools & Methods: NumPy, Pandas, Agile, SDLC, Git, Jira
-

Experience

Kiran Engineering Works - AI & Software Engineer

Sep 2017 - Present · Chhatrapati Sambhajnagar, India (formerly Aurangabad)

- Developed ML dashboards for anomaly detection, enhancing real-time monitoring by 40%.
 - Implemented RAG solutions (LangChain, FAISS, OpenAI) for internal operations, cutting lookup time by 75%.
 - Created multi-agent LLM workflows (LangSmith) for compliance, saving over 60 hrs/month.
 - Automated finance and HR processes using OCR and LLMs, increasing efficiency by 50%.
 - Trained predictive ML models on operational data, reducing downtime by 35%.
 - Deployed ML inference pipelines with logging, boosting system uptime to 98%.
 - Integrated LLM-based retrieval into CRM, enhancing response time by 70%.
 - Launched production AI systems using Python, FastAPI, Docker, and MLOps on AWS/GCP.
-

Independent Projects / Portfolio - Agentic AI & RAG Engineer

Live at parmeetsingh.com

- Featured Projects: YouTube RAG · NetZero Advisor · Research Agent · Legal Document Analyzer
 - YouTube RAG: Converts YouTube videos into a searchable knowledge base with transcript-based Q&A.
 - NetZero Advisor: AI tool for carbon credits and sustainability insights using retrieval and reasoning.
 - Research Agent: Streamlines multi-source research by collecting and summarizing relevant data.
 - Legal Document Analyzer: Extracts answers from lengthy legal documents using structured retrieval.
-

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Contributed to the development and maintenance of enterprise applications, enhancing performance by 30%.
 - Utilized Python for scripting and building REST APIs, improving integration efficiency by 25%.
 - Participated in testing, debugging, and deployment, ensuring a 99% success rate in releases.
 - Gained extensive exposure to Agile methodologies and SDLC practices, improving team productivity by 20%.
-

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
