

Parmeet Singh Granthi

+91 7420004161

Professional Summary

Innovative Software Engineer with a focus on automation and AI systems for enterprise applications. Proficient in designing and deploying web-based platforms using React/Next.js and Node.js/Express, with a strong background in database management using PostgreSQL and MongoDB. Committed to delivering high-quality, maintainable code while integrating AI models and optimizing workflows. Passionate about solving complex business problems through efficient automation and modern engineering practices.

Core Skills

- Web Development: React, Next.js, HTML, CSS, JavaScript, Responsive Design
- Backend Development: Node.js, Express, REST APIs, Automation Logic, Integrations
- Database Management: PostgreSQL, MongoDB, Data Modeling, Optimization
- CI/CD & Security: Git, Docker, CI/CD Pipelines, OAuth2, API Integrations
- Automation & Tools: Webhooks, Background Jobs, JSON, XML, Python Scripting

Experience

Kiran Engineering Works - AI & Software Engineer

Sep 2017 - Present · Chhatrapati Sambhajinagar, India (formerly Aurangabad)

- Developed and deployed automation features for real-time monitoring, enhancing operational efficiency by 40%.
- Created responsive dashboards and workflow builders, improving user engagement and reducing task completion time by 50%.
- Engineered backend APIs and automation logic, streamlining data processing and reducing latency by 30%.
- Integrated AI models into existing systems, resulting in a 25% increase in data accuracy and decision-making speed.
- Optimized database performance using PostgreSQL, achieving a 20% reduction in query response times.
- Implemented CI/CD practices, increasing deployment frequency by 35% and minimizing downtime during updates.
- Collaborated on cross-functional teams to enhance product features, leading to a 15% boost in customer satisfaction.
- Conducted code reviews and contributed to documentation, ensuring high standards of code quality and maintainability.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Assisted in the development and maintenance of enterprise applications, improving system reliability by 30%.
- Utilized Python for scripting tasks and building REST APIs, enhancing integration capabilities with external services.
- Contributed to testing, debugging, and deployment processes, reducing bug resolution time by 25%.
- Gained strong exposure to Agile workflows and SDLC practices, fostering a collaborative team environment.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
