

Parmeet Singh Granthi

+91 7420004161

Professional Summary

Innovative AI & ML Engineer with a focus on integrating advanced AI/ML techniques into cloud data storage solutions. Proven track record in enhancing data processing workflows using Large Language Models (LLMs) and vector embeddings, with strong expertise in Python, PyTorch, and cloud platforms. Skilled in developing scalable AI solutions that optimize SQL queries and improve data retrieval efficiency while ensuring ethical AI practices and performance monitoring.

Core Skills

- AI & ML: Python, PyTorch, TensorFlow, Generative AI, LLMs, Fine-Tuning, Prompt Engineering, MLOps
- Vector Databases & Retrieval: FAISS, Pinecone, Semantic Search, Data Pipelines, Model Optimization
- Build & Deploy: FastAPI, Docker, Kubernetes, CI/CD, AWS/GCP, PostgreSQL, Security
- Data, Tools & Methods: NumPy, Pandas, Agile, SDLC, Git, Jira

Experience

Kiran Engineering Works - AI & Software Engineer

Sep 2017 - Present · Chhatrapati Sambhajanagar, India (formerly Aurangabad)

- Developed AI models for optimizing SQL queries within cloud storage, enhancing data retrieval speed by 40%.
- Integrated LLM workflows for automatic data labeling, reducing manual effort by 60% in compliance tasks.
- Built vector embedding pipelines using Hugging Face, improving semantic search accuracy by 50%.
- Automated data processing workflows, achieving a 35% reduction in operational costs through efficient resource use.
- Trained and fine-tuned predictive models, decreasing downtime by 30% and improving system reliability.
- Deployed scalable AI solutions on cloud platforms, enhancing deployment efficiency by 45% through CI/CD practices.
- Collaborated with cross-functional teams to optimize AI models, achieving a 25% increase in performance metrics.
- Contributed to AI-driven features for sustainability initiatives, helping reduce carbon emissions by 20% in operations.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Assisted in the development of enterprise applications, improving system efficiency by 30%.
- Utilized Python for scripting and building REST APIs, enhancing data integration capabilities by 25%.
- Contributed to testing and deployment processes, achieving a 20% reduction in time-to-market for new features.
- Gained strong exposure to Agile workflows and SDLC practices, improving team delivery timelines by 15%.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
