

Parmeet Singh Granthi

+91 7420004161 | parmeet.singh@parmeetsingh.com

Professional Summary

Proactive problem-solver with a strong focus on performance engineering and benchmarking for large-scale data systems. Experienced in building advanced profiling and observability infrastructure to enhance system performance. Skilled in collaborating with cross-functional teams to identify and resolve performance bottlenecks effectively. Adept at utilizing distributed tracing and observability tools to drive customer-centric outcomes. Committed to delivering optimal solutions through technical excellence and data-driven analysis. Passionate about fostering a collaborative environment that values empathy and results. Proven track record in enhancing system uptime and reducing response times significantly. Dedicated to shaping the future of enterprise AI through innovative performance engineering practices.

Core Skills

- Performance Engineering: Profiling, Benchmarking, Observability, Distributed Systems
- Tools & Technologies: Datadog, Honeycomb, LogicMonitor, Python, Go
- Collaboration & Culture: Cross-Functional Teams, Design Reviews, Customer-Centric Outcomes
- Methodologies: Agile, Data-Driven Analysis, Performance Best Practices
- Problem-Solving: Bottleneck Resolution, Technical Excellence, Empathy, Ownership

Experience

Kiran Engineering Works - proactive problem-solver

Sep 2017 - Present · Chhatrapati Sambhajnagar, India (formerly Aurangabad)

- Developed ML dashboards for real-time monitoring, improving health insights by 40%.
- Implemented RAG assistants, cutting lookup times by 70% and enhancing operational efficiency.
- Created multi-agent workflows for compliance, saving over 50 hours monthly in manual tasks.
- Automated finance and HR processes, increasing accuracy and reducing processing time by 30%.
- Trained predictive models on operational data, minimizing downtime by 30% across systems.
- Deployed ML inference pipelines, boosting system uptime to 99.5% through effective logging.
- Integrated LLM-based solutions into CRM, enhancing response times by 60% and customer satisfaction.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Contributed to enterprise application development, enhancing functionality and user experience.
- Utilized Python for scripting and building REST APIs, improving integration efficiency.
- Supported testing and debugging processes, reducing deployment issues by 25%.
- Gained exposure to Agile workflows, enhancing team collaboration and project delivery.

Projects

Performance Optimization Initiative

- Developed a profiling framework that reduced bottleneck identification time by 50%.
- Collaborated with teams to implement solutions that improved overall system performance by 35%.

Observability Enhancement Project

- Integrated advanced tracing tools, increasing visibility into system performance metrics by 60%.
- Established best practices for observability, leading to a 40% reduction in incident response times.

Cross-Functional Collaboration Program

- Facilitated design reviews across teams, fostering a culture of performance-oriented engineering.
- Achieved a 30% increase in successful project outcomes through enhanced team communication.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
