

Parmeet Singh Granthi

+91 7420004161 | parmeet.singh@parmeetsingh.com

Professional Summary

Proactive problem-solver with extensive experience in performance engineering and benchmarking for large-scale data systems. Skilled in building observability infrastructure and resolving performance bottlenecks to enhance system efficiency. Adept at collaborating with cross-functional teams to drive customer-centric outcomes and ensure high-performance standards. Committed to leveraging data-driven analysis to optimize solutions while maintaining a culture of empathy and collaboration. Experienced in deploying scalable AI solutions and implementing advanced profiling methodologies. Passionate about fostering a performance-oriented mindset across engineering teams. Dedicated to translating complex challenges into actionable insights that improve operational outcomes. Eager to contribute to innovative projects that redefine enterprise AI understanding.

Core Skills

- Performance Engineering: Distributed Systems, Profiling Tools, Benchmarking, Observability
- Data Systems: Large-Scale Data, Performance Optimization, Bottleneck Resolution, Tracing
- Collaboration: Cross-Functional Teams, Customer-Centric Solutions, Design Reviews, Agile
- Programming: Python, Go, Scripting, REST APIs
- Tools: Datadog, Honeycomb, LogicMonitor, CI/CD

Experience

Kiran Engineering Works - proactive problem-solver

Sep 2017 - Present · Chhatrapati Sambhajnagar, India (formerly Aurangabad)

- Developed ML dashboards for real-time monitoring, improving health insights by 40%.
- Implemented RAG assistants, reducing lookup time by 70% and enhancing operational efficiency.
- Created multi-agent workflows for compliance, saving over 50 hours monthly in manual tasks.
- Automated finance and HR processes, increasing workflow efficiency and accuracy by 30%.
- Trained predictive models on operational data, cutting downtime by 30% and boosting productivity.
- Deployed ML inference pipelines with logging, enhancing system uptime to 99.5%.
- Integrated LLM-based retrieval into CRM, improving response times by 60% and customer satisfaction.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Assisted in developing enterprise applications, enhancing functionality and user experience.
- Utilized Python for scripting and building REST APIs, improving integration efficiency.
- Contributed to testing and debugging, reducing deployment issues by 25%.
- Gained exposure to Agile workflows, enhancing team collaboration and project delivery.

Projects

Performance Optimization Initiative

- Developed profiling tools that identified bottlenecks, improving system throughput by 30%.
- Collaborated with teams to implement solutions, enhancing overall application performance.

Observability Framework Development

- Designed and implemented observability tools, increasing system monitoring capabilities by 50%.
- Established best practices for performance reviews, fostering a culture of continuous improvement.

Cross-Functional Collaboration Program

- Led design reviews across teams, ensuring alignment on performance goals and customer outcomes.
- Facilitated workshops that improved communication, resulting in a 20% increase in project efficiency.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
