

Parmeet Singh Granthi

+91 7420004161 | parmeet.singh@parmeetsingh.com

Professional Summary

AI & ML Engineer with a focus on building intelligent systems for consumer finance. Proficient in architecting and deploying AI agents using LangChain, LlamaIndex, and RAG pipelines, with extensive experience in Python, Generative AI, and fine-tuning LLMs. Adept at integrating AI solutions with enterprise systems, ensuring security and scalability while driving impactful user experiences through data-driven insights and automation.

Core Skills

- Agentic AI & RAG: RAG, LangChain, LlamaIndex, LangSmith (Evaluation & Monitoring)
 - Vector Databases & Retrieval: FAISS, Pinecone, Weaviate, Document Loaders, Text Splitting, Retrievers
 - AI & ML: Python, PyTorch, Generative AI, NLP, LLMs, Prompt Engineering, Fine-Tuning, Chatbots, MLOps
 - Build & Deploy: FastAPI, Docker, Streamlit, CI/CD, AWS/GCP, PostgreSQL, Pydantic, Integrations, Security
 - Data, Tools & Methods: NumPy, Pandas, Agile, SDLC, Git, Jira
-

Experience

Kiran Engineering Works - AI & Software Engineer

Sep 2017 - Present · Chhatrapati Sambhajinagar, India (formerly Aurangabad)

- Developed AI-driven anomaly detection systems for real-time monitoring, enhancing operational efficiency by 40% and reducing incident response time by 50%.
- Implemented RAG assistants (LangChain, FAISS, OpenAI) for internal operations, cutting lookup time by 70% and improving data retrieval accuracy by 25%.
- Designed multi-agent LLM workflows (LangSmith) for compliance automation, saving over 50 hours per month and increasing compliance accuracy by 30%.
- Automated finance and HR workflows using advanced AI techniques, resulting in a 45% reduction in manual processing time and improved data accuracy.
- Trained predictive ML models on operational data, achieving a 30% reduction in downtime and enhancing system reliability.
- Deployed robust ML inference pipelines with comprehensive logging, improving system uptime by 35% and ensuring consistent performance.
- Integrated LLM-based retrieval and response generation into CRM, enhancing response time by 60% and increasing customer satisfaction scores.
- Spearheaded production AI systems deployment using Python, FastAPI, and Docker on AWS/GCP, achieving a 99.5% system availability rate.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Contributed to the development and maintenance of enterprise applications, improving application performance by 20%.
 - Utilized Python for scripting tasks and building/supporting REST APIs, enhancing data processing speed by 30%.
 - Assisted in testing, debugging, and deployment processes, reducing deployment time by 25%.
 - Gained strong exposure to Agile workflows and SDLC practices, increasing team productivity by 15%.
-

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
