

December 14, 2025

Dear RelationalAI Team,

I am excited to apply for the Senior Performance Software Engineer position at RelationalAI. With over seven years of experience in performance engineering and a strong background in optimizing large-scale data systems, I am eager to contribute to your mission of enhancing artificial intelligence through the innovative Superalignment technology. My passion for solving complex problems and my commitment to delivering customer-centric outcomes align perfectly with the values and goals of your team.

In my previous role, I successfully led a project that improved the performance of a distributed data processing system, resulting in a 30% reduction in latency and a 25% increase in throughput. My hands-on experience with performance engineering methodologies, combined with my expertise in distributed tracing and observability tools such as Datadog, has equipped me to identify and resolve performance bottlenecks effectively. I thrive in collaborative environments and have a proven track record of working closely with cross-functional teams to drive impactful solutions. I am particularly excited about the opportunity to contribute to design reviews and foster a performance-oriented culture at RelationalAI, as I believe that a focus on excellence is crucial for achieving high-stakes decision-making.

I am looking forward to the possibility of joining RelationalAI and helping to build the reasoning layer for the modern enterprise. I am enthusiastic about the opportunity to leverage my skills in performance engineering to drive innovation and success within your team. Thank you for considering my application. I hope to discuss how I can contribute to your exciting projects in the near future.

Sincerely,

Parmeet Singh
