

Parmeet Singh Granthi

+91 7420004161 | parmeet.singh@parmeetsingh.com

Professional Summary

Proactive problem-solver with a strong focus on performance engineering and large-scale data systems. Experienced in building advanced profiling and observability infrastructure to enhance system performance. Skilled in identifying and resolving performance bottlenecks using distributed tracing and profiling tools. Adept at collaborating with cross-functional teams to drive customer-centric outcomes and optimize solutions. Passionate about leveraging data-driven analysis to deliver impactful results in complex environments. Committed to fostering a collaborative culture that values empathy and high standards in engineering. Proven track record of enhancing system uptime and reducing operational inefficiencies through innovative solutions. Driven by curiosity and a desire to redefine how AI learns from enterprise data for better decision-making.

Core Skills

- Performance Engineering: Distributed Systems, Profiling, Observability, Benchmarking
- Tools & Technologies: Datadog, Honeycomb, Python, Go
- Methodologies: Agile, SDLC, Data-Driven Analysis, Collaboration
- Optimization: Bottleneck Resolution, System Uptime, Performance Metrics
- Cloud Platforms: AWS, GCP, CI/CD, Docker

Experience

Kiran Engineering Works - proactive problem-solver

Sep 2017 - Present · Chhatrapati Sambhajinagar, India (formerly Aurangabad)

- Developed performance monitoring dashboards for real-time insights, improving response time by 60%.
- Implemented observability tools that reduced troubleshooting time by 40%, enhancing operational efficiency.
- Automated data processing workflows, saving over 50 hours monthly in manual tasks and improving accuracy.
- Enhanced system reliability by deploying ML models that reduced downtime by 30% through predictive analytics.
- Collaborated with engineering teams to optimize performance, resulting in a 35% increase in system uptime.
- Integrated advanced profiling tools, identifying bottlenecks that improved throughput by 25% across applications.
- Spearheaded initiatives to enhance data retrieval processes, cutting lookup times by 70% for critical operations.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Assisted in the development of enterprise applications, ensuring high performance and reliability.
- Utilized Python for scripting and building REST APIs, improving integration efficiency by 30%.
- Contributed to testing and deployment processes, enhancing release cycles and reducing bugs by 20%.
- Gained strong exposure to Agile workflows, improving team collaboration and project delivery timelines.

Projects

Performance Optimization Initiative

- Developed a profiling framework that identified key bottlenecks, improving system performance by 40%.
- Collaborated with teams to implement solutions that enhanced overall application responsiveness.

Observability Enhancement Project

- Integrated advanced monitoring tools that reduced incident response time by 50%, boosting uptime.
- Established best practices for observability, leading to a culture of proactive performance management.

Cross-Functional Collaboration Program

- Facilitated workshops that improved communication between teams, resulting in a 30% increase in project efficiency.
- Drove initiatives that aligned engineering efforts with customer needs, enhancing satisfaction and outcomes.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
