

Parmeet Singh Granthi

+91 7420004161 | parmeet.singh@parmeetsingh.com

Professional Summary

Proactive problem-solver with extensive experience in performance engineering, focusing on large-scale data systems and observability. Skilled in building advanced profiling infrastructure to enhance system performance and reliability. Proven track record of collaborating with cross-functional teams to resolve complex performance issues effectively. Adept at employing data-driven analysis to identify and eliminate bottlenecks, ensuring optimal system functionality. Committed to fostering a culture of performance-oriented engineering through design reviews and best practices. Passionate about leveraging technology to drive impactful solutions in enterprise AI. Enthusiastic about exploring unfamiliar components to enhance system understanding and functionality. Dedicated to creating collaborative environments that prioritize both relationships and results.

Core Skills

- Performance Engineering: Profiling, Observability, Benchmarking, Distributed Systems
- Tools & Technologies: Datadog, Honeycomb, Python, Go
- Methodologies: Agile, SDLC, Data-Driven Analysis, Best Practices
- Collaboration: Cross-Functional Teams, Design Reviews, Customer- Centric Solutions
- Data Systems: Large-Scale Data, Performance Optimization, Bottleneck Resolution

Experience

Kiran Engineering Works - proactive problem-solver

Sep 2017 - Present · Chhatrapati Sambhajnagar, India (formerly Aurangabad)

- Developed real-time dashboards for anomaly detection, enhancing monitoring efficiency by 40%.
- Implemented RAG assistants, cutting lookup times by 70% and improving operational workflows.
- Automated compliance processes, saving over 50 hours monthly through multi-agent LLM workflows.
- Enhanced finance and HR operations using OCR and embeddings, streamlining document handling.
- Trained predictive models on operational data, achieving a 30% reduction in downtime.
- Deployed ML inference pipelines with logging, boosting system uptime to 99.3%.
- Integrated LLM retrieval systems into CRM, improving response times by 60% and customer satisfaction.

LTI - Larsen & Toubro Infotech Ltd. - Software Engineer

Apr 2015 - Jul 2017 · Pune, India

- Contributed to the development of enterprise applications, enhancing functionality and user experience.
- Utilized Python for scripting and building REST APIs, improving integration efficiency.
- Supported testing and debugging processes, reducing deployment issues by 25%.
- Gained valuable experience in Agile methodologies and SDLC practices, fostering team collaboration.

Projects

Performance Optimization Initiative

- Developed profiling tools that identified bottlenecks, improving system throughput by 35%.
- Collaborated with engineering teams to implement solutions, enhancing overall performance metrics.

Observability Enhancement Project

- Integrated advanced observability tools, increasing visibility into system performance by 50%.
- Established best practices for monitoring, leading to a 40% reduction in incident response times.

Cross-Functional Collaboration Program

- Facilitated design reviews across teams, promoting a performance- oriented culture within engineering.
- Drove customer-centric outcomes through collaborative problem- solving, enhancing product impact.

Education

- B.E. Computer Science Engineering - PESCOE, Aurangabad (First Class with Distinction, 2010-2014)
